

6-36x56 PM II High Performance

Precision in perfection

The new S&B 6-36x56 PM II High Performance offers the best solution for medium to extreme long-range shooting. Like all of our PM II riflescopes, we designed and manufactured this 6x zoom riflescope according to MIL-STD-810G for handling the harshest environments. Outstanding image quality with a wide field-of-view (FOV) provides superior detail recognition. Reduced weight and size makes it very compact while the new LPI illumination also enables left handed use. The efficient 6-36x magnification range is combined with a 39.5 MRAD elevation turret which supports more precise shot placements.

LPI (Illumination Parallax Integrated)

The 6-36x56 PM II High Performance now features our new “LPI” which stands for the German words “Leucht-Parallaxe-Integriert” and means „Illumination Parallax Integrated“. This new and very easily operable illumination control is integrated into the parallax adjustment and allows a better mounting solution. It also enables a better left handed use. Although being very compact the illumination and the parallax adjustment show the familiar features: on the outer side the smaller and easy to operate illumination knob has 11 functional steps with “off” positions between each step. The bigger knob which is next to the tube operates the very precise side focus/parallax adjustment. It begins at 25 m/27 yd for close distances and goes up to infinity. Both knobs are clearly distinguished by size and rippling while the engravings of each turret can be read or adjusted while in shooting position – also with gloves.

P5FL Reticle

The new P5FL basically resembles the popular pattern of our well-known P4FL reticle which was initially designed for military snipers and has been well-proven around the globe. Reflecting the ongoing technical evolution the new P5FL represents a slight upgrade without forcing the operator to get used to a completely new reticle design. It is also perfect for competition shooters and modern hunters alike who prefer a clean reticle design which is reduced to the most important essentials without distracting features. Those who are already enjoying the P4FL reticle will find confidence in the new P5FL reticle.

The new 6-36x56 PM II High Performance will be available in Germany MSRP 3,780.00 €.

SCHMIDT BENDER

About Schmidt & Bender

Schmidt & Bender has maintained a long track record as a pioneer in Quality and Precision, as well as Tradition and Innovation. These are synonyms for a company with a global name for ultra-high-quality riflescopes. We believe it is only those companies who determine to set themselves challenges that will experience the successful performance levels that only elite quality development and production can achieve. Time after time, Schmidt & Bender measures itself against the best in the sector of the industry – and we do so very successfully. The overarching goal of our design and development work is to achieve our uncompromising quality targets. The manifest outcome is that we meet the highest standards of quality in all categories of riflescope development: riflescopes that set new technical standards and precision devices that impressively demonstrate our philosophy, 'Precision Makes the Difference'!
